CAM is the acronym of CAMTER for Computer Aided Machine Tools. The CAM system usually is a machining application to machine a part automatically. CAMTER The CAMTER (Computer Aided Machining Tools Enterprise) project was started to develop a CAM system which integrates the machining functions of some commercial CNC machines. The project was initiated in 1994, funded by TKM 1997, and is jointly operated by: The Community The CAMTER community is a cooperative effort for the development of a common computer-aided machining environment. The project promotes interoperability between the CAD/CAM systems and the collaborative coordination of all projects. It includes: The CAMTER community is formed by: a consortium of CNC machine manufacturers (e.g. HPC or their OEMs), a community of users who use CNC machines (e.g. companies of this sector), CAMTER, the manufacturer of the CAM system, and the TKM, the owner of the technology. The CAMTER community is organized in: CAMTER Users CAMTER Users (CU) are the users of the CAMTER community, using either CAMTER or CAMTER-like CAM systems. CAMTER users can be either: Manufacturers Manufacturers are the users of the machine tools. A manufacturer can either be a CAMTER user, or a manufacturer of CNC machine tools, for which CAMTER is not sufficient for an efficient operation. The CAMTER consortium The CAMTER consortium (Consortium des machines à créer avec des outils de conception automatique, short Consortium) is the group of CNC machine manufacturers, with the objective of integrating the CAMTER system in their machines.
